mShare Privacy Policy

This is the company's policy which is created to give details and informs you if your personal information is collected, used, disclosed and secured by the company. These policies are stated to ensure you know what personal details you may or may not disclose when the software is being utilized and the choices you have associated with that data. If you decide to continue using this software, it means you accept all terms and conditions stated by the company in this policy.

Permission and Access

mShare software requires some permissions to function effectively and efficiently. Without some of these permissions enabled, you might not be able to perform certain operations with the software.

mShare requires permissions to enable the following on your device:

1. Camera

2. Location

3. Storage

4. Telephone

The main permission required to get mShare functioning is the storage permission, the rest permission are sometimes required to perform some operations but they are optional and can be enabled and disabled anytime at will when not in use.

Information and Data Collection

The company does not externally collect any information or data when the services of mShare are utilized. When performing some activities with the software, personal data is not collected by the company because all the information is locally stored on your device. Information contained in a file might be shared between paired devices during an operation but not in any way linked to the company.

Crash reports sending

mShare is stable and works fine but you may still experience few errors and crashes, information about these crashes are important to us so that the issues cane be fixed immediately and the software is running efficiently again.

If you encounter an issue during the use of this software, please feel free to send an email directly to the company on mathrithms@gmail.com.

Service Providers

mShare is dependent upon the services of third-party libraries to facilitate its utilization and to perform service-related services or to assist in analyzing how the services of the software are used.

These third parties have access to your personal data only to perform these tasks on the developer's behalf and are obligated not to disclose or use it for any other purpose.

Transfer of Data

With these third-party libraries contained in the software, your information, including personal data, may be transferred to computers located outside of your state, province, country or other governmental jurisdiction where the data protection laws may differ than those from your jurisdiction. Your consent to this Privacy Policy followed by your submission of such information represents your agreement to that transfer.

Links to Other Sites

mShare contains links to other services that are not directly operated by the company. If you click on a third party library web-page of license URL, you will be directed to that third party's site. The company has no control over and assumes no responsibility for the content, privacy policies or practices of any third party sites or services.

There are also links in the app that redirects you to a web-site created by the company with the information related to the developers of the app.

Changes to thsi Privacy Policy

The company may update this policy as there will be further development of the software and these developments will likely not be consistent with some statements and terms contained in this current policy.

It is advisable to check this policy periodically for any changes. Changes to this Privacy Policy are effective when they are made on this document.

Disclaimer

The operations of mShare is basically for file sharing which is a daily activity. During this process, there's a high probability that personal data contained in some files might be shared with a paired client which might lead to security breaches and you may encounter loss and damages. The company will not be held accountable for how yoou decide to use this software and for contents you decide to share with a party and will not be liable for any losses and/or damages in connection with the use of the software.

About us

mShare is a project developed by Mathrithms. The development of the mShare app is a group effort of different individuals who have contributed immensely to the project.

mShare is an open source Android software that solves file sharing problems, such as slow speeding over a bluetooth connection, failed to send operation etc. These problems are solved with mShare which utilizes the wifi network as a means of transmission and files are shared seamlessly over a wifi connection to another device. mShare is designed to allow this operation to be paused or resumed at any time even when there is a case of an error.

mShare utilizes wifi network and not an internet connection meaning that internet data is not consumed when the software is utilized and also even in areas where there is a poor internet connection, the software still functions optimally.

The software allows multiple files of different formats to be sent simultaneously.
